

✓ Window Guard Options:

Guardian Angel Window Guards

- Can be used on most windows, single hung, double hung, casement, awning and sliders.
- Durable steel construction designed to withstand 150 pounds of pressure.
- Quickly and easily removed with emergency release buttons.
- Fit windows from 14 inches to 120 inches.
- 3 7/8 inch spacing between bars prevents children from falling through.
- Installs easily and securely into window frame using 4 screws.
- 4 button safety release buttons may defeat curious children
- Meets current [ASTM Standard F2090-08](#)

KidCo Mesh Window Guard

- Mesh design blends with window treatments giving it a pleasing look
- Can be used on Single and Double Hung Windows
- Fits window sizes 26"-40" wide
- May work on Sliding Windows if height of opening is 31 1/2" or less (**Window Guard may need to be opened to open windows**)
- Quick release hardware for emergency escape for adults and older children
- Meets current [ASTM Standard F2090-08](#)
- Available in White
- May be available in Local Stores

Disadvantages:

May only work on some windows

John Sterling Window Guards

Manufactured with Durable Steel

- Limited use - used on Single or Double Hung Windows guards swing open for emergency escape
- Sized from 14" wide to 76" wide
- Guards can be installed vertically above the 6th floor where there is no emergency rescue through windows
- Child Safety Guards can be opened by an adult or older child in case of an emergency (when installed as shown, horizontally)
- Meets (**outdated**) ASTM Standard F2090-01a

Disadvantages:

Does not work on Sliding or Casement Windows for Emergency Escape

Large Black Safety Release Pin may attract curious children

Does not comply to current 2008 or newer ASTM standards

Does not come with removal instructions imprinted on product
